16. **16.** Ask Erik
17. **17.** Your Profile & Signing Out
18. **18.** Admin & Permissions
19. **19.** Backup
20. **20.** Quick Reference & FAQ

1. Getting Started

How to log in, what happens the first time, and a tour of the Home screen.

🔑 Logging In

Tap your name (or photo) on the login screen and enter your password. That's it — you're in.

First-Time Setup

Everyone starts on the same temporary password. The very first time you log in, the app will ask you to:

- 1 Create your own password (at least 6 characters)
- 2 Confirm it

Meet Erik As soon as your first-time setup finishes, our chatbot mascot "Erik" will pop up automatically with a quick walkthrough covering clocking in, mileage, receipts, and submitting a job — the fastest way to get oriented. You can ask Erik follow-up questions right there or close it and come back to him later using the button described in [Ask Erik](#).

🏠 The Home Screen

Home is your landing page after login. It shows:

- The ✂ **Quick Actions** button (see next section)
- A grid of every tab you have access to
- A red badge on any tab with something waiting for you (new tasks, approvals, etc.)
- A "Getting Started" checklist card that tracks which features you've tried, until you've explored them all

🛠 App Hub

Beyond the main job app, S&H runs a few companion tools reachable from the App Hub screen: the **Room Scanner** (photograph a room to auto-generate Xactimate line items), the **Marketing Hub** (social posts and the adjuster outreach kit), and the **Strategy Planner** (financial planning tools). Ask an owner if you need access to one of these.

2. Quick Actions

EVERYONE

The three things field crew do constantly — clock in, log a drive, log a receipt — are one tap away from Home. No digging through tabs.

- 1 From Home, tap the navy  **Quick Actions** button near the top.
- 2 **Clock In / Out** — pick a job (optional) and tap Clock In. Tap again later to Clock Out. This works right there in the panel — no need to leave Home.
- 3  **Start Mileage Trip** — jumps straight into the Drive & Time tab with live GPS tracking already running.
- 4  **Add Receipt** — jumps into the Receipts tab with the Add form already open, ready for a photo or manual entry.

Stay on the screen while tracking mileage Live GPS mileage tracking only runs while the Drive & Time tab is open. If you switch to another tab mid-trip, tracking stops. Wait until you've stopped the trip before navigating away.

3. Jobs

The core of the app — every job's info, photos, hours, receipts, and history live here.

+ Submitting a New Job

- 1 Tap the dropdown at the top of the app and choose **+ Submit**.
- 2 Fill in Client Name, Job Type, and Address — these are required. Everything else is optional but helpful.
- 3 Tap the 🎙 mic on any text field to dictate instead of type.
- 4 If this is a bid that hasn't been signed yet, check  **Estimate Only** — it shows an amber "Estimate" badge on the job list so the team knows there's no signed contract yet.
- 5 If there's a lockbox or gate code, enter it under  **Property Access PIN**.
- 6 Save. The job now appears on the Jobs tab.

Finding & Viewing a Job

Go to  **Jobs**. Search by client name, address, or job number using the search bar, and filter/sort using the dropdowns below it. Jobs are grouped — Estimates that haven't been signed show separately from Contracted (active) jobs.

Editing a Job

Open the job, then tap  **Edit** in the top right. Make your changes and tap **Save All Changes**.

Photos & Markup

Open a job's Photos section and tap the camera icon to add pictures. Open any photo and tap  **Markup** to draw on it — useful for pointing out damage or measurements directly on the image.

Measurements

Open a job and expand the Measurements accordion to log room dimensions, square footage, or other job-specific numbers.

Tools

The Tools accordion on a job includes helpers like the deck designer for sketching and estimating deck projects.

Change Orders

Open a job and scroll to the purple **Change Orders** section. Tap **+ Add**, describe the extra work and its dollar amount, and check **Customer Approved** once they've signed off.

Job Updates

Scroll to the bottom of a job for **Job Updates** — a running log of notes. Tap **+ Add**, type or speak your update, and tap **Post Update**. Your name and the time are saved automatically.

Assigned Crew

In the **Assigned To** section on a job, tap each crew member's name to toggle them on or off. You can assign multiple people to one job — they all show on the job card.

Payment Status

Scroll to **Payment Status** to enter deposit and final payment amounts, mark them received, and log the date paid. A summary card totals it all up.

4. Estimates & Remote Client Signing

EVERYONE

Build a bid and get it signed without ever meeting the client in person.

- 1 Go to the  **Estimates** tab and tap **+ New Estimate**.
- 2 Add line items and the total, then save.
- 3 Tap  Email or  Text — the message goes out pre-filled with a secure signing link. There's nothing to download or attach; the client just taps the link.
- 4 The client reviews the estimate and signs right on their own phone.
- 5 Once they sign, the job automatically moves from the Estimates group into **Contracted** on the Jobs tab, and both owners (Brandon and Erik) get a task to schedule it.

In person instead? You can also collect a signature face-to-face — see Contracts below.

5. Contracts & Invoices

EVERYONE

In-Person Signing

Go to  **Docs** and tap the green  **Contract** button. Both you and the customer sign directly on your phone screen.

Sending Any Document

From the  **Contracts**,  **Invoices**, or **Estimates** tabs, every document has  **View**,  **Print**,  **Email**, and  **Text** buttons. Email and Text open pre-filled with a secure link to that document — no downloading or attaching files on your end, and nothing for the client to install.

6. Receipts

EVERYONE

Two ways to log a receipt:

- **Tied to a job** — open the job, scroll to Receipts, tap **+ Add**.
- **Not tied to a job** — go to the  **Receipts** tab and tap **+ Add** (or use ↗ Quick Actions from Home).

Snap a photo of the receipt and the app's AI scanner will pull out the vendor and amount for you automatically. Fill in the category and mark whether it was paid by the Company or by you personally.

7. Drive & Time

EVERYONE

The  **Drive & Time** tab covers both your work hours and your mileage in one place.

Time Clock

Switch to the Time Clock view, optionally pick the job you're working, and tap **Clock In**. Tap **Clock Out** when you're done — your hours are logged automatically. You can also clock in/out instantly from the  Quick Actions panel on Home.

Forgot to clock out? If you're clocked in for more than several hours, the app will remind you with a notification.

Mileage

Switch to the Mileage view and tap **Start Trip** to begin live GPS tracking, or use **Manual Entry** if you'd rather log a trip by odometer readings or start/end addresses. Tap **Stop Trip** when you arrive. Reimbursement rate, fuel price, and vehicle info are all factored in automatically.

Keep the tab open Live tracking stops if you navigate to a different tab. Stay on Drive & Time until you tap Stop Trip.

8. Contacts

EVERYONE

Go to  **Contacts** and tap **+ Add**. Store customers, suppliers, subcontractors, employees, insurance adjusters, and more in one place. Every phone number and email is tap-to-call or tap-to-email.

9. Schedule

EVERYONE

The  **Schedule** tab shows a calendar with every active job color-coded. Tap any day to see what's scheduled. The legend below the calendar lists every active job this month with its date range.

10. My Tasks

EVERYONE

The ✓ **My Tasks** tab is your personal to-do list inside the app — assigned tasks, follow-ups, and system-generated items (like "schedule this newly-signed job") all land here. A red badge on the Home screen tells you when something new is waiting.

11. Documents

EVERYONE

Go to  **Docs** and tap **+ Upload**. Choose the document type (General, Contract, or Invoice), pick your file, and upload — it's saved for the whole team to see.

12. Rates, Materials & Cost Calculator

EVERYONE

Going Rates

A searchable reference list of labor and service rates by category — handy when writing up an estimate. Admins can add, edit, or bulk-import a price list (including Xactimate price lists).

Materials

Look up material prices, compare suppliers, and run a live web price search across retailers when you need a current price. Note this is a research aid — always confirm the price before quoting a client.

Cost Calculator

Go to  **Cost Calc** to run a full job cost and profit breakdown. Choose **Fixed Contract** or **Time & Material** billing, enter the job details, and see tax, cost, and profit all worked out for you.

13. Leads

EVERYONE

The  **Leads** tab tracks prospective jobs before they're won — contact info, job type, estimated value, source, and status (New, Contacted, Follow Up, Quoted, Won, Lost). Keeping this current helps the whole team see what's in the pipeline.

14. Purchase Approvals

EVERYONE

Any purchase of **\$200 or more** requires approval from the other owner (Brandon or Erik) before it's finalized. When you submit a \$200+ purchase request:

- The other owner gets a push notification and has **4 hours** to approve or object.
- If there's no response within 4 hours, the purchase is automatically approved so work isn't held up.
- Mark a request as **Emergency** if it truly can't wait — this flags it for immediate attention.

15. Voice Input

EVERYONE

Almost every text field in the app has a  mic button. Tap it, speak clearly, and your words appear as you talk. Tap ■ to stop. If it doesn't respond, check that your browser has microphone permission enabled in your phone's Settings.

16. Ask Erik

EVERYONE

Tap the Erik character floating in the bottom corner of the app any time you need help. Ask a question in plain English — "How do I add a receipt?", "How do I log hours?" — or tap one of the quick-question buttons. Erik also links out to this guide (🌐 Web Guide and 📄 PDF Guide) if you'd rather read the full manual.

17. Your Profile & Signing Out

EVERYONE

Tap your initials or photo in the top-right corner of the header to upload or remove a profile photo — it syncs across all your devices. You'll also find **Change Password** and **Sign out** there.

18. Admin & Permissions

BRANDON, ERIK & MATT

The  **Admin** tab is where owners manage the team. Open any employee's card to set:

Permission	What it controls
+ Submit Jobs	Can create new job submissions
⇌ Edit Jobs	Can edit existing job details
🗑 Delete Items	Can delete receipts, notes, hours, contacts
💰 See Dollar Amounts	Can see costs, receipt totals, payment status
💾 Download Backup	Can export and download all company data
👤 View Contacts	Can access the Contacts tab
📁 View Documents	Can access Docs, Contracts, and Invoices tabs

Visible Tabs

Below the permission toggles, use the **Visible Tabs** chips to control exactly which tabs an employee sees in their app — green means shown, grey means hidden. Tap **Show All** to remove any restriction and go back to unrestricted access.

Only Brandon, Erik, and Matt can open the Admin tab, no matter how the chips are set — it's always hidden from everyone else.

19. Backup

BRANDON, ERIK & MATT

Go to  **Backup** and tap **Download Excel Backup** for a spreadsheet of every job, receipt, hour logged, and note — or **Full Backup** for Excel plus a raw JSON copy of everything.

20. Quick Reference & FAQ

EVERYONE

Who can delete things?

Brandon, Erik, Matt, Karla, and Rick. If you don't see a Delete button, you don't have that permission.

Why is a job showing an amber "Estimate" badge?

It means the client hasn't signed yet. It'll move to Contracted automatically once they sign, or you can uncheck "Estimate Only" yourself.

Why did my mileage trip stop early?

Live GPS tracking only runs while the Drive & Time tab is open on screen. Switching tabs stops it — stay put until you tap Stop Trip.

The client says they never got the estimate/invoice link.

Double-check the phone number or email on their Contacts record, then try Email or Text again from the document's action buttons.

My purchase over \$200 hasn't been approved yet — can I go ahead?

It will auto-approve after 4 hours if no one responds, so work doesn't stall. Mark it Emergency if you truly can't wait that long.

I can't see a tab I used to have.

An admin may have restricted your Visible Tabs. Ask Brandon, Erik, or Matt to check your Admin card.

Still stuck?

Tap Erik in the bottom corner and just ask — in plain English, no special phrasing needed.
